

Prevail[®]

RESIDENT DISCHARGE

Your facility's custom-branded resident discharge video, website, and take-home collateral will help your residents successfully transition from your facility to their home or where caregivers can help them. The program will equip them with educational tools and resources to help avoid common causes of readmission, such as falls, skin health issues, and infections. We have also partnered with ARKRAY[®], a leading supplier in the diabetes market, to educate your residents on their diabetes needs as they transition home.

Prevail[®]

Prevail® Resident Discharge

The Resident Discharge Program, sponsored by Prevail® provides you with the tools to help your facility meet the requirements for discharge planning.

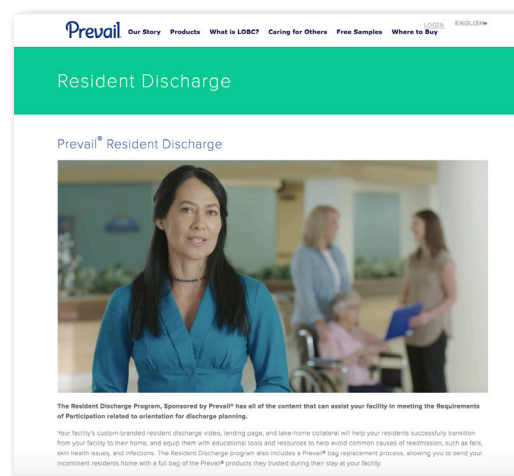

Video Education

The Resident Discharge video is an effective way to communicate with a departing resident about how to prepare for the transition home. It contains general tips and suggestions on how to prevent fall risks, infections, and other common issues that may result in readmission. The video is hosted on your custom-branded landing page, presented to residents as valuable information specifically from you.

Custom-Branded Website

ResidentDischarge.com/yourname provides your residents even more information about transitioning home, as well as access to the video once they are discharged.

Take Home Education

The Going Home pocket folder allows your residents and their caregivers to have valuable education to look through as they prepare to go home. The content contains helpful tips, checklists and note-taking areas to ease their transition. You will have your own custom-branded insert containing important contact information and a link to your custom-branded Resident Discharge website.

Would you like to implement the Resident Discharge program at your facility? Contact your First Quality Sales Ambassador to help set you up with all of the tools and resources you'll need.
